25X4 USAF

MEMORANDUM FOR CHAIRMAN AND MEMBERS, DCI SIGINT COMMITTEE

SUBJECT: Royal Moroccan Air Force (RMAF) Electronic Warfare (EW) Support (U)

BACKGROUND:

(S) The United States Government has previously approved sale of the ULR-666 Radar Warning Receiver (RWR) to the Government of Morocco (GOM). General Instrument Corporation of Hicksville, New York holds the munitions control license. Recently, the GOM has requested assistance from the United States in countering the SA-6 due to loss of several RMAF aircraft to this hostile system.

| (S) Specifically, the RWR will have to be programmed with | 0.EV.4 |
|---|--------|
| The following parametric data from the Electronic Warfare Integrated Reprogramming data base would be used: | 25X4 |
| | |
| | 25 |
| | US |
| | |

(S) A 20 January 1982 message from MUSLO, Rabat Morocco stated that Ambassador Reed, MUSLO, General Instruments and Col-Maj Kabbaj, Chief RMAF met on 18 January 1982 to discuss the ULR-666 modification. The RMAF again requested the SA-6 and Gundish data.

REQUESTED ACTION:

(S) Request approval for threat data release to the U.S. contractor only, General Instrument Corporation, for programming the ULR-666 RWR. The request is for initial and recurring release on any threat which is validated by USAF, NSA and DIA.

State Dept. review completed

RONALD T. SMETEK, Lt Col, USAF Alternate SIGINT Committee Member
